INSTRUCTIONS:

- Pull 60 to 80 hairs from the horse's mane or tail. The **follicle (hair root)** must be attached. Do not cut the hair. • Tape the hair in the box below, making sure that the **sticky tape does not touch the hair roots**.
- Place this form with the **horse hair sample into a plastic zip-top bag**. Each sample must be in its own plastic bag.

Example of plucked horse hair:

The roots are the slight thickenings at the ends of the hairs

The bundled hair sample should be taped to this collection form below
